

Project	Metal	POW Interest	Current Status	Targeted Key News 2020
<u>AUSTRALIA</u> Victoria Goldfields Joint Venture	Gold	49.9%	12 applications over (2,188 km ² .) Completed historic project reports, exploration planning and NI 43-101	Potential grant of exploration licences, starting with first 3 priority applications, then launch of exploration programmes. Progress updates for listing on North American stock exchange.
<u>BOTSWANA</u> Ditau Camp Project	Rare Earths	50%	2 licences (1,386km ²) Rare earths potential established from recent exploration work.	Commence orientation study to assist in the characterisation and exploration vectoring for the Ditau Project carbonatite ring-structures potentially hosting rare earths.
<u>BOTSWANA</u> Kalahari Copper Belt Project	Copper Silver	50%	2 licences (1,386km ²) southwest of Sandfire Resources' T3 and A4 Dome copper-silver discoveries.	Exploration results from soil sampling, then ground magnetic surveying, and possibly airborne electromagnetic surveying, leading into drill target development.
<u>BOTSWANA</u> Molopo Farms Complex Project	Nickel Copper PGMs	Up to 50.96%	3 licences (1,780km ²) with multiple targets identified from electromagnetic survey and ground geophysics.	Planned launch of maiden drill programme and thereafter delivery of results from drilling to the market including on-site findings and laboratory assays
<u>CAMEROON</u> Cobalt Blue Project	Cobalt Nickel	100%	4 licences adjacent to, or within 50km of the Nkamouna/Nada cobalt/nickel deposit.	Announce findings from review of exploration strategies and potential commercialisation options.
<u>CANADA</u> Silver Peak Project	Silver	30%	Mineral claims over historical Eureka-Victoria Silver Mine and high grade, intrusion related, polymetallic Ag-Pb-Zn-Cu veins.	Planned launch of drill programme targeting high grade silver veins and following channel sampling in September 2020 which highlighted bonanza grade of up to 14,937g/t (482 oz/t).
<u>DRC</u> Kisinka Copper Project	Copper Cobalt	70%	Exploration licence of 41 carrés miniers (each 84.95 ha) with a 6.8km copper anomaly identified.	Copper/cobalt assay results pending from 2020 pitting programme. Conversion of the licence to a Permis d'Exploitation (production license) with a 25 year life.
<u>TANZANIA</u> Haneti Project	Nickel Copper PGMs Gold etc	35%	Large polymetallic land package of c5,000 km ² including 80km long ultramafic complex with drill ready nickel sulphide/ PGM targets.	Planned launch of maiden drill programme and thereafter delivery of results from drilling to the market including on-site findings and laboratory assays
<u>USA</u> Alamo Gold Project	Gold	Up to 75%	Package of mining claims covering c766 acres prospective for gold following the discovery of native gold nuggets near surface.	Planned follow on exploration programme after initial short reconnaissance survey conducted successfully in August 2020.
